**MEDICAL DECISION  
MAKING:**

The patient was stable during her stay here. The patient was quite anxious and was given Valium 5 mg IM without any change in her demeanor. I contacted Dr. Holmes, our plastic surgeon on-call, and discussed the case with him. He wants me to close the laceration of the lip and have her follow up in the office with him.

I contacted the patient's orthodontist, Dr. Kevin Coles. He came to the Emergency Department to see the patient and evaluate her. I discussed with him treatment from that point. The patient was medicated with a total of 12 mg Versed IV. Dr. Coles at this point cut her braces and moved her teeth into proper alignment.

At this point I anesthetized the upper lip locally with 1% Xylocaine with epinephrine. It was then cleansed thoroughly and closed with 6-0 Ethilon sutures with good approximation. The patient tolerated the procedure well. Her pulse oximetry remained in the high 90s throughout her stay. The patient will be discharged. The facial surgeon, Dr. Hill, was contacted and she will follow up with him for further evaluation of the teeth and she will involve him in the lip laceration as well.

**DIAGNOSES:**

1. Acute lip laceration.
2. Acute dental trauma.

**PLAN:**

- (1) Laceration instructions.
- (2) Follow up with Dr. Hill on Monday.
- (3) Return to the Emergency Department sooner for any worsening or further problems in the interim time.
- (4) The patient was discharged in stable condition.
